

# Reflection

---

First of all, it will be an honor and a privilege for me to contribute my skills and competencies, with a vocation for service, ethics, a high level of commitment and responsibility, to the fulfillment of the specific objectives and purpose of the Academy of Engineering, as required by the Statute to the position of Secretary, in its different roles.

I invite you to reflect before exercising your right to vote, please analyze the proposals (advantages, disadvantages, benefits and risks that are taken when making a certain decision), and assess the best option. This is based on evaluating who could better trace the path to lead our beloved AI to the position of leadership, of effective influence at the national level, and to be an international benchmark, in the short, medium and long term. This must be the priority to base our election, a rational vote. I do not fail to mention that regardless of the decision you make, it is necessary that as a member of the AI, you continue to collaborate, supporting the Academic Council that is chosen; our loyalty must always be with the Academy. Today more than ever, facing the great challenges and new challenges of our great Nation, the Academy of Engineering, requires that its distinguished members participate and collaborate with contributions in strategic areas and topics in an intense and dynamic way, in order to exercise its leading role and active participation with impact, so that together we make AI a useful institution for the society and our country.

It is evident, even more because of the current situation, the dimension of the challenge that we will face the next biennium, as members of this prestigious institution. Let us add and integrate our talent, vocation for service, ethics and professionalism to the Academy of Engineering, in order to achieve effective influence and impact on Mexico's strategic decisions.
