

Message from Oscar Monroy, Pro-treasurer candidate Term 2020-2022

Dear colleagues;

In this brief message I would like to express my new commitment to serve you, as fellows of the Academy of Engineering of Mexico (AIM), from the position of Pro Treasurer, if I am favored with your vote.

I will work with the Board of Directors, particularly with the Treasurer, to achieve the objectives of the Academy which are: to promote and disseminate Engineering at the highest level and with social commitment, contributing to Mexico's equitable and sustainable development, focusing on our eight great challenges: food and rural development; competitiveness and innovation; engineering education and research; energy and sustainability; infrastructure, transportation and cities; manufacturing and services; natural resources and climate change; health.

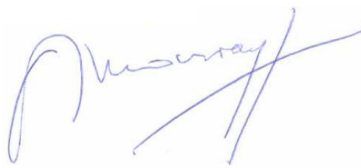

As AIM is a non-profit civil association, the funds that we receive must be used to promote our objectives which, we are convinced, are in the national interests. Our concern for having quality teaching with innovative programs in all engineering schools, as well as focusing research on the eight great challenges, is central for the fulfillment of our goals, so the organization of activities (seminars, courses and conferences) bringing us closer to young engineers should continue to be one of our main activities.

We must convince more sponsors of the virtues of our purposes by demonstrating that we meet our quotas to maintain AIM's presence in society.

I hope to contribute with my fellow candidates to the Board of Directors to strengthen the work plan of the AIM's President to achieve our goals, ensuring that finances are used optimally.

Thank you very much.

Sincerely

Oscar Armando Monroy Hermosillo
Member of the Environmental and the Municipal and Urban
Engineering Specialty Commissions
